✚ Socio Economic Research.

- ➔ UdZ has focused its efforts along the 4th year in defining operative actions following CONCERTO+ recommendations:
 - ▶ Development of a common methodology with performance indicators for monitoring the progress of local communities.
 - ▶ Questionnaires are a critical tool for collecting data and to obtain indicators!
 - ▶ But... things happen to be quite complicated:
 - Questionnaires are ignored
 - Building Administrators, simply, do not collaborate
 - Many housing remain unoccupied...
 - The crisis does not help to connect with neighbors. They keep distant...
 - Not too much effort and time devoted (bureaucratic problems)

Socio Economic Research

Future developments

▶ 12 months scenario. We keep trying different strategies:

- Creation of a specific Website to “motivate”/get people involved
- Monthly magazine of the neighborhood
- Meetings and questionnaires personally assisted
- The CUS (Centre of Sustain. Urban/Demonstration building)
- The monitoring data (included own data from new meters)

▶ 18 months scenario: idem, but strengthening mechanisms more efficient. Probably

- A mix of the above with the specific help of CUS activities and strong exchange of experience with Lyon
